Professional Summary

MCA graduate with hands-on internship experience and a strong foundation in full-stack web development. Comfortable working across the entire stack — from building REST APIs and managing databases to crafting responsive frontends and deploying applications. A self-driven developer who ships complete, working products and is looking to grow within a collaborative engineering team.

Technical Skills

Languages Python, TypeScript, JavaScript, SQL, Dart, C
Frontend Next.js 14, React, HTML, CSS, Tailwind CSS
Mobile Flutter (Android)
Backend FastAPI, Django, REST APIs, JWT Authentication, bcrypt
Databases MongoDB, Prisma ORM
Tools Git, GitHub, Vercel, Docker, VS Code, Kali Linux, Ubuntu

Experience

Full Stack Developer Intern — Growify India *Apr 2026 – Jun 2026 • Remote*

- Developed and maintained features for a live multi-tenant school management platform using Next.js and REST APIs, handling separate data per institution.
- Worked across frontend (React components, responsive UI) and backend (API routes, database queries) throughout the full development cycle.
- Participated in code reviews and followed agile practices in a remote team environment using Git and GitHub.

Technology Job Simulation — Deloitte Australia (Forage) *Nov 2025 • Remote*

- Built a data-analysis dashboard to surface business insights; completed engineering tasks in a structured consulting simulation.

Projects

ProofChain — Blockchain-Based Digital Evidence Platform proofchain-web.vercel.app • [GitHub](#)
Next.js 14 • FastAPI • Python • MongoDB • IPFS • Gemini Vision API • Polygon Amoy Testnet

- Full-stack platform for secure digital evidence management — evidence is stored on-chain for tamper-proof immutability with a complete chain-of-custody audit trail.
- Smart contract on Polygon Amoy testnet handles evidence submission, custody transfers, and verdicts; AI service (FastAPI + Gemini Vision) analyses files for tampering using metadata and visual inspection.
- Role-based access control (Investigator / Analyst / Admin) with secure auth — JWT, bcrypt hashing, account lockout, and email verification.
- Frontend deployed on Vercel; AI microservice deployed on Render — fully live and accessible.

CodSach Student Hub — Academic Resource Platform codsach.vercel.app • [GitHub](#)
Next.js • GitHub API • Flutter

- Built a web platform for MCA students to access and download academic resources including lab programs, study notes, question papers, and software tools.
- Developed a companion Android app using Flutter; integrated GitHub for resource storage and content management.

Certifications

Cybersecurity Job Simulation — Deloitte Australia (Forage) *2025*

Introduction to Linux (LFS101) — The Linux Foundation *2026*

Education

Master of Computer Applications (MCA) *2024 – 2026 • CGPA: 8.15*
St. Philomena's College (Autonomous), University of Mysore

Bachelor of Computer Applications (BCA) *2021 – 2024 • CGPA: 7.68*
JSS College of Arts, Commerce & Science, University of Mysore
