

SACHIN R

Software Development Engineer — Full-Stack Developer

Mandya, Karnataka | rsachinsachi@gmail.com | +91 8861585332
linkedin.com/in/sachinr-dev | github.com/Codsach | sachinr.vercel.app

PROFESSIONAL SUMMARY

Full-stack developer experienced in building production backend and full-stack systems with TypeScript, Next.js, Node.js/Express, Python (FastAPI), and PostgreSQL/MongoDB. Built ProofChain, a blockchain-based digital evidence platform with AI-powered tamper detection, and shipped reporting, bulk-ingestion, and certificate-generation systems for a live multi-tenant SaaS product during a full-stack internship. Seeking a Software Development Engineer (SDE-1) role to build reliable, scalable systems.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, Python, Java, SQL

Frontend: React, Next.js, Tailwind CSS | **Databases:** PostgreSQL, MongoDB

Backend: Node.js, Express, FastAPI, REST APIs, Prisma ORM, JWT Authentication

Tools & Platforms: Git/GitHub, GitHub Actions, CI/CD, Docker, AWS S3-compatible storage (Cloudflare R2), Vercel

Core Concepts: Data Structures & Algorithms, OOP, DBMS, Operating Systems, Computer Networks

EXPERIENCE

Full Stack Developer Intern — Growify India

Apr 2026 – Jun 2026

Remote

- Engineered 7+ full-stack modules (inventory, live-class scheduling, teacher performance, reporting) as a core contributor on a 7-engineer team building a multi-tenant school-management SaaS (Next.js, Express, Prisma ORM, PostgreSQL).
- Authored 120 commits (~15% of ~786 total) and 110K+ lines, building a transaction-safe inventory system with soft-delete architecture and an 8-report analytics engine with Vitest-tested Excel/PDF export pipelines.
- Developed a cloud-integrated certificate issuance pipeline (Cloudflare R2, S3 API) with sequential numbering and bulk generation, plus a live-class API for 4 user roles with conflict detection and UTC-safe attendance reporting.

PROJECTS

ProofChain — Digital Evidence Management Platform

[Live](#) | [GitHub](#)

Next.js, FastAPI, Solidity, Ethers.js, MongoDB, IPFS, JWT/2FA

- Solely architected a publicly deployed forensic evidence platform (40 API endpoints, email-verified auth, 3 roles) with an EVM smart contract (Solidity, Ethers.js) anchoring SHA-256 hashes and IPFS CIDs on Polygon, plus a zero-trust re-hashing verification API.
- Engineered a containerized Python/FastAPI microservice running a 12-signal composite tamper-scoring algorithm (Vision Transformer, Gemini Vision API, EXIF/MIME/PDF/video forensics), validated with 34 automated pytest test cases.
- Secured the platform with JWT (15-min access/7-day refresh) + TOTP 2FA, brute-force lockout, and timing-attack mitigation; used fire-and-forget async pipelines for AI scoring and blockchain anchoring to keep responses fast.
- Set up a GitHub Actions CI/CD pipeline (lint, typecheck, pytest, build) with automated Vercel deployment.

CodSach Student Hub — Academic Resource Platform

[Live](#) | [GitHub](#)

Next.js, TypeScript, GitHub API, Zod

- Solely designed and built a Git-backed headless CMS (Next.js, TypeScript) using the GitHub REST API as a zero-cost database, serving 4 resource categories across 8 pages with recursive Git-tree traversal and parallel blob fetching.
- Implemented type-safe server-side pipelines (Genkit flows, Zod validation) with tag-based cache invalidation for real-time updates, plus an admin panel with GitHub-token authentication and multi-criteria filtering.
- Set up a GitHub Actions CI/CD pipeline (lint, typecheck, build) with automated Vercel deployment.

EDUCATION

Master of Computer Applications (MCA) | CGPA: 8.22

2024 – 2026

St. Philomena's College (Autonomous), University of Mysore

Bachelor of Computer Applications (BCA) | CGPA: 7.68

2021 – 2024

JSS College of Arts, Commerce & Science, University of Mysore

CERTIFICATIONS

Introduction to Linux (LFS101) — The Linux Foundation, 2026

Gen AI Master Certificate — Google Gen AI Academy, Cohort 3, Hack2skill — Issued Sep 2026
